DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4, 12-15 and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Tsuchida (JP 3-59-109328). Tsuchida discloses the claimed limitations as follows: extruding a parison (8); cutting it open longitudinally to form an opening (8a); inserting stays (10) into the parison through the opening; closing the molds (14); heating the parison (8); and blowing compressed air for form a reinforcing body (16) with the stays (10) integrally formed therein.

3. Claims 1, 3, 4, 6, and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Hidekazu (JP 61-032,735). Hidekazu discloses the claimed limitations as follows: extruding a parison (3); forming a slit (5) therein that extends longitudinally; inserting a preform (7) into the parison; and blow molding to form a headrest with the preform molded therein.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over Tsuchida (JP 3-59-109328) in view of Kasugai (US Patent 4,952,347). Tsuchida teaches the claimed limitations as follows: extruding a parison (8); cutting it open longitudinally to form an opening (8a); inserting stays (10) into the parison

Art Unit: 1732

through the opening; closing the molds (14); heating the parison (8); and blowing compressed air for form a reinforcing body (16) with the stays (10) integrally formed therein. Tsuchida does not teach that the body formed is a fuel tank. Kasugai teaches a method of forming a fuel tank by blow molding an extruded parison with an insert therein. It would have been obvious to a person of ordinary skill in the art at the time of the invention to use the method taught by Tsuchida to form the article taught by Kasugai in order to quickly and easily form a fuel tank with an insert integrally bonded thereto.

Allowable Subject Matter

6. Claims 5-9 and 16-19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
